POT TYPES

General Technical Information

- Vase;It can be used as a flower bed,stone bench and wooden bench etc.
 - The pot width size is produced in parallel with the system width. For an external measurement, contact your project consultant.
 - The flower pot option is produced entirely from sheet metal. The surface function is galvanized + painted.
 - All screws used are 304 quality stainless.
 - In the flower bed option, a fiber pot should be added to the pot.
 - In the option of using stone benches, wooden benches etc., an additional twisted aluminium sheet is added to the pot.
 - It is compatible with external conditions due its undergoing of preservative treatments such as baking and wood impregnation.
 - There are two colours of impregnation wood treatment. These are green and brown. For other colors and applications, please contact your project consultant.
 - The material used for the stone bench is white granite bergama.
- Granite thickness is 42 mm. The maximum width is 300 mm. It is applied by dividing according to the size of the project.
